

Castello di Brianza, 10th October 2016

QUALITY POLICY

The main goal of our company consists in supplying products that fulfil customer and market requirements, in compliance with existing laws and regulations, with applicable standards and specifications, within the planned delivery time.

In order to pursue this target, the Quality Management System has been specifically studied to keep company activities under control, establishing measurable indicators in order to monitor process and products. The Quality Management System is re-evaluated on yearly basis by the company management.

Company activities are performed in compliance with applicable Italian and international standards, specifically UNI EN ISO 9001:2015, and directive 214/68/UE (PED) if requested by customer.

The company management takes into account the expectations of the stakeholders that are considered relevant for the Quality Management System.

In order to keep all processes under control, the company carries out a risk analysis for all the processes that make up its activity.

The employees' awareness, participation and motivation are part of the company policy, and are achieved by communicating the market trend, as well as the trend and the implementation of the Quality Management System.

The company management believes that the continuous efforts aimed at keeping production technology at the state of the art, together with the co-engineering and the service offered to customers, grants the company a consolidation and improvement of its position on the market.
